Encounters in Planning Thought

16 Autobiographical Essays from Key Thinkers in Spatial Planning

Edited by Beatrix Haselsberger

Encounters in Planning Thought creates an informed future perspective on spatial planning by looking at it through the eyes of those who were at the coal face of planning’s scholarly institutionalisation. The book provides insight into why and how 16 distinguished planners, as they matured and built their ideas over the last half-century, have done what and when. It brings together leading planning scholars from Europe, America and beyond, including John Friedmann, Patsy Healey, Rachelle Alterman and many more. Crucial reading for those interested in spatial planning, this book sets out a comprehensive intellectual, institutional and practical agenda for the discipline of spatial planning.
